PROFESSIONAL PROFILE

Frontend Developer with experience in React and a strong focus on management systems, backoffice solutions, and administrative and financial processes. University Graduate Accounting Analyst with over 9 years of experience in operations and financial management. I have collaborated in the development of web systems using artificial intelligence agents as development support, combining business insight, technical judgment, and modern technologies to build practical and efficient solutions.

TECHNICAL SKILLS

JavaScript (ES6+), HTML5, CSS3
React JS, Bootstrap, CoreUI
Reusable components, hooks, state management
Forms with validations, tables with filters and pagination
REST API consumption
Use of AI agents as development support
Git & GitHub

FRONTEND DEVELOPMENT PROJECTS

Management System / ERP – Personal Project

Development of CRUD modules for products, clients, and suppliers. Administrative dashboards, sales, inventory, and cash flow processes. Use of reusable components, form validations, and API consumption. Interface built with CoreUI.

"Cancha-Llena" Web System – Development Collaboration

Collaboration in the development of the Cancha-Llena web system, participating in the integration of external services such as Mercado Pago (payment processing) and Google Places (search and geolocation). The work involved connecting frontend, backend, database, and APIs. The implementation was carried out using artificial intelligence agents (OpenCode), guided through requirements analysis, documentation review, testing, validation, and iterative adjustments. This process served as an active learning experience, strengthening my foundations in programming and system architecture.

WORK EXPERIENCE

Operations & Finance Manager – Construction Industry (2016 – 2025)

Comprehensive management of administrative and financial processes. Resource optimization, cost analysis, and decision-making focused on business efficiency and results.

EDUCATION

University Accounting Analyst – Universidad Blas Pascal (Graduated March 2, 2018)

Frontend Development – Coderhouse (JavaScript & React JS, Completed September 2024)
