PROFESSIONAL SUMMARY

Frontend Developer specialized in React and JavaScript, with experience collaborating on ERP systems, management platforms, and business-oriented web applications. I combine technical skills with more than nine years of experience in operations, administration, and finance, allowing me to quickly understand business requirements and translate them into practical software solutions.

TECHNICAL SKILLS

- JavaScript (ES6+), HTML5, CSS3
- React.js, Bootstrap, CoreUI, SCSS
- Reusable Components, Hooks, State Management
- Forms, Validations, Data Tables, Filtering and Pagination
- REST API Integration
- Git & GitHub (Branches, Pull Requests, Code Reviews)
- AI-Assisted Development Workflows
- Responsive Design and Mobile-First Interfaces

DEVELOPMENT EXPERIENCE

FluxERP – Frontend Contributor (2025 – Present)

- Developed and modified React components for POS, Customer Account Management, and commercial modules.
- Implemented responsive mobile interfaces.
- Fixed issues related to payments, customer credits, and financial calculations.
- Worked with reusable components, searches, and progressive data loading.
- Collaborated using Git, feature branches, and Pull Requests.
- Analyzed business requirements and translated them into software solutions.

FRONTEND PROJECTS

Argos System – Personal Project

Management system developed with React and Firestore to manage customers, products, inventory, and sales.

Cancha Llena – Web Reservation Platform

Collaborated in the final development stage of a sports reservation platform, implementing frontend improvements and new features.

La Cumplidora – Business Landing Page

Commercial landing page developed for a beverage distribution company.

PROFESSIONAL EXPERIENCE

Operations & Finance Coordinator – Construction Industry (2016–2025)

EDUCATION

University Accounting Analyst – Universidad Blas Pascal (2018)
Frontend Development – Coderhouse (JavaScript & React.js, 2024)
